

# COATED VEGETABLE SEEDS

Dr. Rose brand becomes a brand for agricultural activities.

BANAIE R&D has a research Laboratory and produces **ROOTING HORMONE** and **SUPER FERTILIZERS**.

Vegetable seeds are one of **Dr. Rose's** areas of expertise. All vegetable seeds in Iran are produced in the best way and are coated after sorting and cleaning. **Dr. Rose** is an expert in covering all kinds of seeds.

The Rhino coating system is a very special system that was completely designed and implemented by BANAIE R&D and can coat or pelett up to 1,000 kilos of seeds per hour.

## ROOTING HORMONE

Net Weight : 250g

**BANAIE R.D**  
Engineer MOHSEN BANAIE'S  
Research & Development

ready for use powder

**Dr. ROSE Rooting Hormone** is a growth supplement containing source of minerals to help create conditions which encourage deep and healthy root development in cuttings and young plants

**Directions for Use For Cuttings**

Take cuttings using a sharp knife. Cut straight across below a leaf joint or bud remove leaves the lower third of the cutting. Stand cuttings in water after preparation Shake off excess water then dip one or two cm into **SELECTIV** Hormone prior to pricking out with a dibber into a sand/peat compost. Alternatively, sprinkle the powder sparingly directly into the planting hole, prior to pricking out. Where pots or trays are used cover with a clear polythene bag. Use elastic bands to seal around the lip of the pot or tray and place in a light but not sunny position.

For Young Transplants: Sprinkle the powder sparingly into the planting hole, prior to re-potting young Plants. This root growth supplement contains no fungicides.

**Helpful Advice:** Wash hands after use Product may irritate cut or broken skin Store in a dry place away from children, pets and foodstuffs.

M. B.87 is a natural Fertilizer and a beneficial addition to all feeding programs for Wheat and Barley. Works in conjunction with all nutrition and feeding programs. Stabilizes the pH values and microbiological life and improves the absorption of nutrients. M. B.87 improves soil structure. M. B.87 contains supplemented by natural plant microelements.

Store in an airtight container after opening in a cool dry place. Keep out of children & pets.

LIQUID

**BANAIE R.D**  
Engineer MOHSEN BANAIE's  
Research & Development

**1 Liter**

**SPECIAL FERTILIZER FOR  
WHEAT & BARLEY**

### M.B.87:

- 100% Organic
- Reduction of root nematode damage
- Compatibility with the environment, human and animal health
- Strengthening the defense system at the root
- Increased absorption, especially calcium and Fe
- Fungi Killer
- Toxins
- Nematode
- Pesticides
- Insecticide
- pH Regulator
- Soil Salinity Regulator

**LANDA** is an Anti Stress Fertilizer. Due to the positive effects of the combined use of zinc and boron elements in bud growth and flowering. Foliar application is very important in the bud swelling stage and before flowering. This fertilizer can increase flowering. Increasing the quantity of products is one of the benefits of using this combination at the right time. In winter and in severe cold, emergency shutdown of the greenhouse heating system causes stress to the plants. This fertilizer is used to prepare plants in case of emergencies.

Store in an airtight container after opening in a cool dry place. Keep out of children & pets.

**1.000g**

**ANTI STRESS FERTILIZER**

Guaranteed Analysis	
N	%3
Zn	%6
B	%0,65

### LANDA:

- Increases the number of flowers
- Anti-Stress
- Strengthening the defense system at the root
- Prevents the fall of flowers, buds and blooms
- Germination speeds up flower
- Increased resistance to cold and pests

# GRAFTING BALL

GRAFTING BALL is a Rapid Rooting Method. Use the ancient air layering method, grow directly on the branches; copy existing plants and produce new plants.

GRAFTING BALL can help to get stronger rhizomes without damaging the mother plant. You can check the spreading effect within 6-8 weeks after installation.

# GRAFTING BALL

-  Environmentally Friendly Materials
-  Super High Quality
-  Easy to Disassemble
-  Save Time

## BALL SIZE A1

Diameter: 120mm  
High Pressure  
Branch Size: 12 - 31mm  
For: Anthurium

## BALL SIZE B1

Diameter: 80mm  
High Pressure  
Branch Size: 7 - 12mm  
For: Roses, Orchids, Ficus
